

Erodex Inc and SAVI Precision Engineering are pleased to announce the formation of a Strategic Partnership in the supply of Aerospace and IGT solutions, utilising their joint engineering capabilities and the logistical capabilities of SAVI Mexico. Through this partnership we be able to provide more responsive technical-qualification support and cost-effective services to the many Aerospace and Industrial Gas Turbine (IGT) operations in Mexico.

Both Erodex and SAVI operate to the requirements of ISO 9001 / AS 9100 Rev D and relevant NADCAP process approvals, supporting the necessary quality requirements of our customers.

Erodex specialises in the design and manufacture of EDM electrodes, brass tubes for Fast hole EDM and associated consumables, as well as tooling design, manufacture and refurbishment supporting all processes for Aerospace and IGT components.

The Erodex Group is based across 4 UK sites and a specialist tooling division in the USA.

SAVI Precision Engineering specialises in the manufacture and assembly of quality, low cost small-medium sized precision fabricated components for Aerospace and IGT applications. The current focus is on critical gas turbine sealing and airflow components, such as inserts, tubes, impingement plates and fabricated honeycomb / interstage seals.

Our commercially and technically optimized production center in Hermosillo, Sonora, Mexico, allows us to deliver product at market leading prices, whilst providing customers with a sustainable, reliable and totally independent supply chain, with logistics, engineering and sales support from SAVI Ltd UK.
