

THE LEADING EDGE

EDM Sink and Wire Engineer

Although 2020 has been a terrible year for businesses, it has allowed Erodex to expand its portfolio in what it can offer its customers in support of its die-sinking electrode and EDM wire supply. The aim is to give a greater level of support to both existing and new customers through the addition of the in-house applications facility. This will enable Erodex to develop customer's work ahead of being in loaded to their production facility and in turn benefit from the understanding and knowledge of the Erodex team.

The Erodex Group has gained a world class reputation in EDM supplies, with a focus on aerospace and IGT. The development of this new area is an exciting step and one that requires additional internal capacity to continue with the ongoing level of leading class support.

Erodex are looking to expand the existing EDM team with an engineer who has experience in both EDM die sinking and EDM wire cutting.

The position will include programming, setting and operating, so appropriate experience is required.

A background in aerospace and IGT would be beneficial.

The position is based in Halesowen but may include site visiting within The UK and Europe, as well as potential visits to The US and Mexico, depending on customer requirements

This is a full-time, permanent position, Monday to Friday days, 39 hours.

Competitive rate of pay.

If you feel that you have the qualities and skills to succeed in this role then please apply today, by sending your CV to HR@erodex.com.

Closing date: 31/01/2021

Please be advised that the closing date may be brought forward if there is a large number of applicants. If your application is suitable, we will contact you within 7 working days of the closing date. If you do not hear from us within this time your application has unfortunately been unsuccessful.

Strictly no agencies or telephone calls.
